**Gold Production.**—The gold yield during December quarter, 1921, was 9,508 oz. fine, valued at £40,387, and showed a decrease of 4,568 oz. fine, and £19,407 in value, compared with December quarter, 1920. The value of the gold produced during the year ended 31st December, 1921, was £217,370.

**Retail Prices, Sydney.**—From the information collected as to average retail prices of food in Sydney, it appears that in December, 1921, the prices of meat were 19 per cent. higher than in July, 1914; other food and groceries were 61 per cent. higher; and the prices for the two combined were 50 per cent. higher.

Prices of meat were  $2\frac{1}{2}$  per cent. lower than in November; other food and groceries, 4 per cent. lower; and the two combined were  $3\frac{1}{2}$  per cent. lower.

Compared with the corresponding month (December) of 1920, meat was 33 per cent. cheaper; other food and groceries were 15 per cent. cheaper; and the two combined were 19 per cent. cheaper.

The commodities for which the price levels are computed are those in every-day consumption.

**Wholesale Prices.**—During the December quarter the general level of wholesale prices dropped by 6 per cent., and is now 35 per cent. lower than the highest point reached in July, 1920.

There was a decrease in the index numbers of all groups, with the exception of wool, cotton, &c., which showed an increase.

The fall in prices was greatest in the group, agricultural produce and dairy produce, mainly due in the first case to a decline in prices of wheat, flour, and hay, and in the second case to decreases in the price of butter, cheese, and lard.

Of the 100 commodities used in forming the index numbers, 40 commodities remained unchanged during the quarter, 18 increased and 42 became cheaper, the decrease being substantial in the case of wheat, flour, butter, bran, pollard, and iron.

**New Buildings—Metropolis.**—According to returns supplied by the several Town Clerks, the number of new buildings erected in the Metropolis during the year ended 31st December, 1921, numbered 5,567 as compared with 8,667 during the year 1920.

**eteorology.**—December quarter, 1921.—The rainfall during October was above the average over the north-eastern quarter of the State, except the north coast and in parts of the south-east corner and Riverina. In November the fall was below the average almost generally, and at several stations no rain was reported. In December the rainfall was above the average except in a few scattered parts in the west and south-west and on the southern highlands. An extensive monsoonal rainstorm operated at the close of the month over parts of the north-east quarter. Strong and squally east to southerly winds reached gale force on the coast with rough sea.

**Labour Conditions in December Quarter, 1921.**—The following particulars in regard to Employment and Dislocations have been taken from reports of the Department of Labour and Industry:—

*Employment.*—The Director of the State Labour Exchanges reports that at the end of December there were about 9,000 persons out of work in the metropolitan district and about 4,000 in the country districts. These figures are exclusive of a large number of persons whose employment was suspended in consequence of the closing of nearly every factory and workshop prior to Christmas; during the month of January the majority of these workers were re-engaged. The persons affected by unemployment included workers in the engineering, iron, building, and furniture trades, also waterside workers, salesmen and clerks; there was a scarcity of women workers.

During the December quarter, 6,591 positions for men and 2,627 for women were made available by employers through the agency of the State Labour Exchanges, and 6,316 men and 1,785 women were placed in positions; in September quarter, 9,200 positions were made available, and 8,600 persons were placed in positions.

The positions made available by the employers during the year 1921 numbered 37,478, viz., 27,805 for men and 9,673 for women; 26,343 men and 7,210 women were sent to employment.

*Dislocations.*—During the December quarter 25,426 employees were involved in industrial dislocations owing to disputes, and the total loss amounted to 90,135 working days. The dislocations were less serious than in the previous quarter, when 44,293 employees were involved, with the loss of 137,686 days. Preliminary figures for the year 1921 show a total loss of 674,429 working days, as compared with 2,300,378 during the previous year.

*Increases in Wages.*—The principal increases in wages during December quarter were as follows:—To slaughtermen (beef), 23s. 6d. per week, pork 8s. per week; brass-finishers (general), 3½d. per hour; plumbers, 2½d. per hour; blacksmiths, boilermakers, cabinet-makers, chair-makers, coppermiths, engineering brass-finishers, fitters and turners, French polishers (male), moulders and pattern-makers, 1½d. per hour; upholsterers (male) 1½d. per hour.

In a number of cases the weekly and hourly wage rates have been reduced in accordance with the Board of Trade declaration of 8th October, 1921.

### No. 68.—New South Wales Estimated Wheat Harvest, 1921-22.

A preliminary forecast of the wheat harvest of the season 1921-22, published by the Government Statistician on 16th January, 1922, states that sowing operations were retarded in several districts in consequence of rain, which was general throughout New South Wales, but the reports received indicate that a satisfactory harvest may be expected.

The yield is estimated at 15,093,000 bags, equivalent (on the basis of 3 bushels to the bag) to 45,285,000 bushels.

The area to be harvested for grain was estimated at 3,169,200 acres, so that the average production for the State will be 14·3 bushels per acre.

The number of growers in the current season is 18 257, or 711 more than in last season.

The following table gives particulars of the areas and estimated yields in the principal divisions of the State.
